Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner indicated to applicant that the term "at least one downrigger counter" should have a functional recitation after it in order to properly set forth the function of the counter. Examiner suggested adding the phrase "for measuring a depth of a fishing line" after "downrigger counter" to describe the counter's function as that of measuring the depth at which the fishing line is set. Also proposed amendments to overcome claim objections and 35 USC 112, 2nd paragraph problems. Applicant agreed to the proposed changes. Please see Examiner's amendment for details.
